Special Applications

Garage Exhaust

Flexaust® has manufactured durable, long lasting, flexible hose and ducting solutions for industrial and commercial applications for 75 years. Our flexible hose products are used in applications involving air, dust, fume and lightweight materials. We offer the largest selection of products including wire reinforced coated fabric hose, wire reinforced plastic hose in regular as well as stretch construction, hand-bendable metal ducting, all plastic wet or dry vacuum hose and blow molded corrugated tubing products.

Flexaust® Product Selection Guide

There are five critical factors in selecting the proper hose and ducting for your application. These are: Size, Temperature, Application, Media and Pressure. The superior strength of Flexaust® hose and ducting makes them suitable for the pressures and velocities normally required for industrial air movement, dust collection, fume control and light bulk material handling.

- S** **SIZE:** Specify the I.D. of the Flexaust hose or duct required.
- T** **TEMPERATURE:** Specify media temperature (°F).
- A** **APPLICATION:** Specify if Air, Fume, Dust and/or Light Weight Materials will be flowing through the hose or duct. See listings to the right.
- M** **MEDIA:** Specify what media is going through the hose or duct.
- P** **PRESSURE:** Specify type of pressure. Positive (psi), Negative (Inches Hg.) and/or Inches w.g.
